

CSW-600 [15"]

System	Floor-standing Bass-Reflex System
Woofer Unit	380mm (15inch) Cone Type Woofer With 100mm (4inch) Coil×1 unit
Freq. Response	40Hz~4,000Hz
Low Pass Filter	-
Sensitivity	103dB/W/m
Max SPL Peak	133dB
Max SPL Continuous	130dB
Max Input Power	1000W
Rating Input Power	600W
Recommended Amplifier	800W (DAP-8000)
Connector	Neutrik SpeakON® NL4MP×1 (2+ /2-)
	Screw type×1 (+/-)
Impedance	8Ω
Dimensions (mm)	410 (W) ×545 (H) ×545 (D)
Weight	30.0kg per piece
Enclosure Material	Baffle:21mm Birch Plywood Closure:15mm MDF
Grille	5.2mm Custom perforated steel grille
Finish	Black, Raindrop Paint
Handing Position	Handle on both sides

# CSW SERIES

## Compact subwoofer but delivers a powerful bass sound

MOGAMI paper cone highlights the use of the highest quality materials and most advanced technology available in Japan.  
Outputs an eye-popping 1,000 W max for such a small and compact size.  
Equipped with SpeakON and Screw Connectors to add versatility and open up numerous audio options.

A “MOGAMI” paper cone and a large voice coil (4-inch) are used for the 15-inch Woofer’s diaphragm to deliver a higher transient response characteristic and a full bass sound.

Each speaker enclosure consists of a baffle (high-strength 21mm birch plywood) and a 15mm MDF board casing. It is strong enough to endure powerful vibrations from the driver. As well as the sprinkle-paint finish to the surface, the speaker enclosure has excellent durability and provides good protection against impact.
