

PROFESSIONAL Category

Powerful PA speaker fits in various music scene with deep bass.

Woofers use reliable paper cone Made in Japan.

Box hanging bracket, arranged so as to be installed in all of the PA and KTV.

Rotatable BMB logo plate and woofer/tweeter make it possible to set up the speakers anywhere.

1. PA type spealer, for large Karaoke room or stage event.

2. It matches not only karaoke but also music of various genres.

The vibrating membrane of compression drivers, uses titanium nitride material made in Japan.

By ultra hardness nitriding the titanium foil it is possible to play the ultra high above the audible frequency range that is essential for a good music playback.

The Tweeter

The voice coil is a large diameter of \$45mm, and have excellent power handling, exerts a strong driving force. Also, the electric wire by adopting those molded pure aluminum wire in flat shape, and realize a highly efficient driver with good transient response lightweight.

Together with lightweight titanium nitride vibrating membrane, can be reproduced to the super-high region.

The Woofer

The voice coil is a large diameter of φ75mm (CSS-2010:φ 75mm), and have excellent power handling, exerts a strong driving force.

Wire is the φ0.37mm thick aluminum wire (CSS-2010: φ0.32 aluminum wire). Lightweight and excellent transient response, and provides a bass with a sense of speed, the sound quality without distortion.
